Turn the handle until the die goes through the cutter completely. Remove the mat and excess fabric. Cut strips to size using a rotary cutter according to the instructions in the chart above.

Applique and Embroidery Instructions

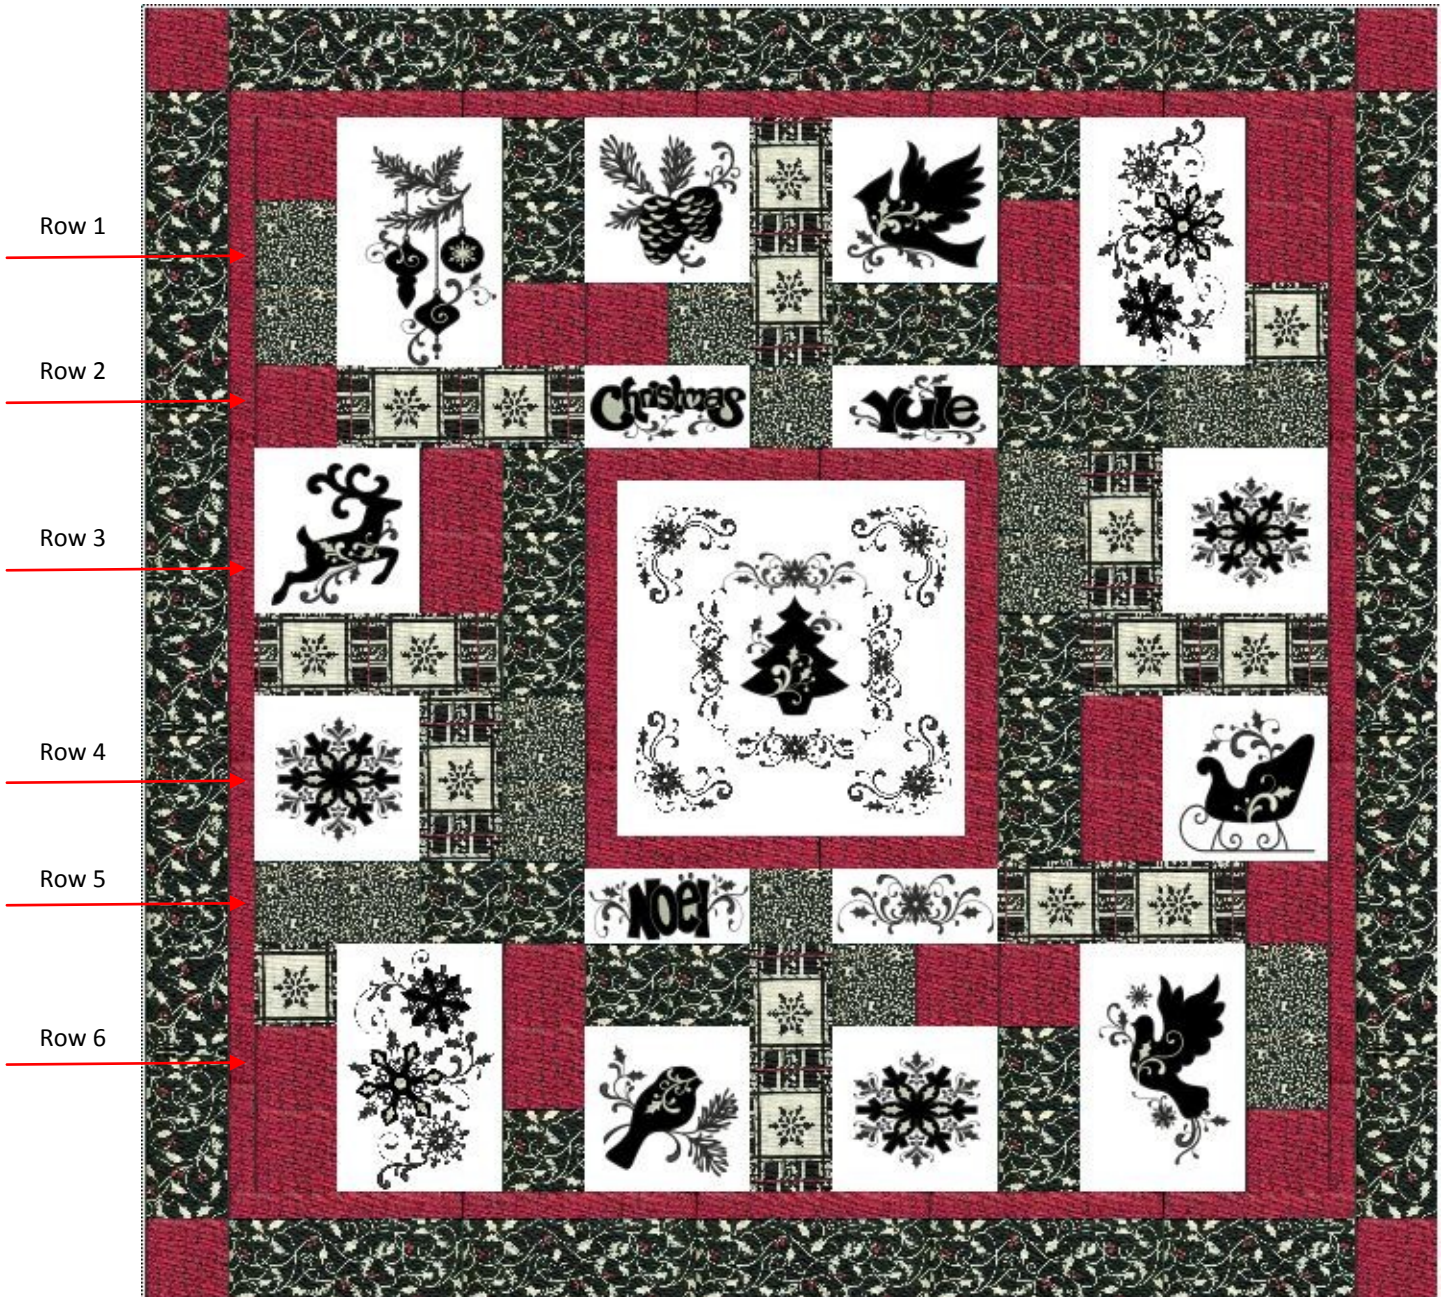

NOTE: The background fabric is cut larger. Square up and trim blocks to the sizes indicated *after* embroidery is complete. Embroidery design information for each block is found on pages 4 - 8.

Iron Applique Fuse and Fix to the wrong side of the applique fabric. Use the appropriate Go! Die to cut each applique or use the templates provided in the design collection to trace and cut manually.

Stitch the first color and the applique placement line. Remove the backing from Applique Fuse and Fix and position the applique piece to cover the placement line. Fuse and Fix is repositionable for perfect placement. Proceed to the tackdown stitching and complete the design.
