

1. Right click on the file. Click on Save Target As.

2. Download to your desktop. When the download is complete, click on Close.

3. Open My Label. Minimize the program.

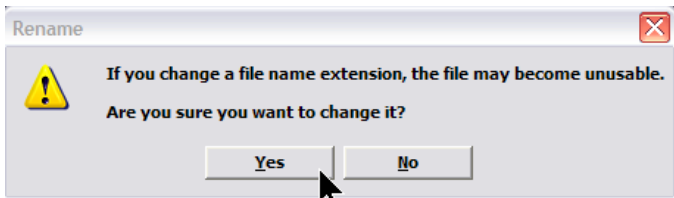

4. Right click on the downloaded file. Select rename.

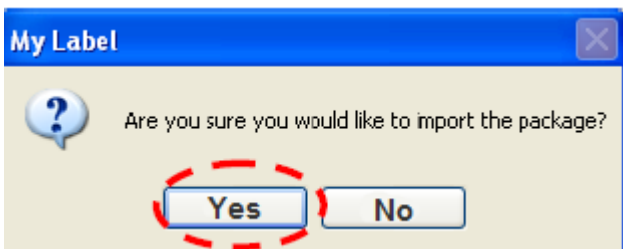

5. Highlight the extension and change the extension from .zip to .pdz.

6. You will get a message about changing the file extension and making it unstable, but do it anyway. Click Yes.

7. You will get a dialog box that asks about importing. (make sure the program is minimized) Click yes.

8. Confirm by clicking OK.

Note: You can also rename the file extension prior to saving to your desktop.
